ENVIRONMENTAL & WASTE MANAGEMENT POLICY

Select Veneers (UK) Ltd recognises that, as a manufacturer of woodworking products, our business has an impact on the environment in terms of the waste it generates, its use of raw veneer & emissions to air and water. We are committed to protecting our local environment and employees and accept that we have a responsibility to minimise any potential harmful effects arising from our activities.

We recognise that our employees have an important role in enabling us to meet our objectives. We will ensure they are made aware of our commitments and are given the training and support to enable them to play their part.

To help us realise our commitments we have in place processes and procedures that help us to:

- Identify, minimise or eliminate, and risk of pollution
- Maximum our use of materials, so as to reduce waste
- Source environmentally friendly materials wherever practical
- Maintain our accreditation with sustainable timber verification agencies
- Reduce to a minimum our use of packaging
- Recycle, as much as possible, all packaging received from suppliers
- Ensure the responsible disposal of our non-recyclable waste
- Conserve energy and water by monitoring and analysing usage
- Use environmentally friendly means of travel wherever practical.

We are committed to working with our neighbours, our suppliers and our customers, not only to help us improve our environmental performance, but also to help them improve theirs.

We will continually review this environmental policy and update it whenever necessary.

Erik Browne:

Director:

Date: 28/11/2018

A handwritten signature in blue ink, appearing to be "Erik Browne", written over a horizontal line.
